

*Connaitre pour mieux protéger
la biodiversité tropicale*

www.crgbbj.org

Who Are We ?

We are a worldwide network of multidisciplinary experts (agronomists, ecologists, entomologists, botanists, etc.), coordinated by a tropical fauna and flora specialist: Séverin Tchibozo.

Our Missions

- Sustainable management and conservation of natural resources;
- Inventory mammals, insects and forests;
- Long term protection vegetation;
- Sound agricultural and phytosanitary practices;
- Enhancing the value of natural ecosystems through tourism and ecotourism.

Some of our Projects

- Edible insects: a method of reducing malnutrition and ensuring food safety;
- Educating tourist guides about biodiversity and the need for preserving it;
- Mid-term evaluation of transboundary biodiversity projects by TRIDOM (Central Africa) and WAP (Western Africa);
- Tropical biodiversity data base in partnership with Bhutan and Costa Rica.
